Pacific Northwest
NATIONAL LABORATORY

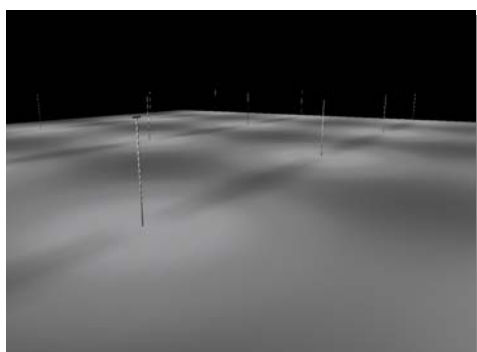

What do we have in common?

Today goal: ...spark university-industry collaborations that will develop and commercialize new green building and renewable energy products and services to help fuel Oregon's green economy.

DOE CBI description: Public-private partnerships to achieve continuous technology improvement and commercialization of advanced building technologies at an accelerated pace

National Accounts and Energy Alliances

- ▶ DOE national labs teamed with 23 National Accounts to:
 - Build **one new building at 50% less energy** than Standard 90.1
 - Retrofit a **building that uses 30% less energy** than the CBECs baseline or 30% less than the mean of their building portfolio
- ▶ Energy Alliances provide forums to share and access information, identify technology needs and design demonstrations and procurements to fill those needs.

Where Do We Go From Here

- ▶ Send us your best and brightest students and collaborators
 - Help wanted
 - Internships and post-docs
- ▶ If you are working with national accounts get them involved with DOE's Energy Alliances
- ▶ Stay tuned in to the next phase of the National Accounts Program for likely solicitations for design assistance
- ▶ On-going collaborations
